

OUR SUSTAINABILITY COMMITMENT ENCOMPASSES:

Knowledgeable and Responsible Driver Guides

- Our driver guides are passionate and well-informed about New Zealand's unique attributes.
- They engage with guests, offering insights into the nation's history, culture, and hidden treasures.
- New Zealand is full of conservation stories about saving NZ's natural treasures, from Lake Manapouri and the podocarp forests of the West Coast. We tell these stories and also stories about the great challenges in conservation, including revegetation with native plant species, removal of wilding pine trees, possums and other predators and bird life restoration.
- We emphasise the significance of preserving New Zealand's unspoiled environment, conveying a powerful message about its cleanliness, greenery, and timeless beauty.

Respect for the Department of Conservation and other public estate

- As an integral part of our guiding service, we operate within the Department of Conservation lands and other public estate. Our driver-guides promote the "leave only footsteps, take only memories" ethos.
- LSQ actively advocates and ensures responsible conduct in natural surroundings, ensuring no litter is left behind, visitors adhere to designated signage and trails, and all wildlife is treated with respect and left undisturbed.

Reducing Our Carbon Footprint

- LSQ is actively involved in supporting the Trees that Count initiative, which is helping to restore native vegetation and protect New Zealand's threatened biodiversity.
- Some of our tour packages include a donation to fund planting a tree, which we pass on to Trees that Count.

At Limousine Services Queenstown (LSQ), we recognize the privilege of introducing and sharing our beautiful country with international visitors from around the world. We are committed to preserving the natural beauty of New Zealand and supporting our local community to ensure this privilege is available for future generations.

Commitment to an Eco-Friendly Fleet and Driver Training

- Our management team is dedicated to researching and transitioning to more sustainable vehicle options as they become available in New Zealand. We continue to assess electric and hybrid vehicles, biofuels and hydrogen fuels, and enhancements in ICE engines (internal combustion).
- Our current fleet comprises late-model diesel vehicles maintained to the highest environmental standards.
- In 2023, we purchased three new vans that meet the Euro 6 standard, which is the highest international standard for diesel vehicle emissions. These vehicles also feature 2-litre motors instead of 3-litre V6 diesel engines, offering 30% greater fuel efficiency while still delivering ample horsepower and torque.
- Our tracking system allows us to analyse every trip to seek further efficiency in fuel consumption.
- All LSQ driver-guides receive professional training to encourage fuel-efficient driving practices.
- We continuously seek fuel efficiencies in our operations, including limiting air conditioning use to essential situations and avoiding idling on-site.

Environmental Responsibility through Plastic Reduction and Recycling

- We actively minimise paper usage by leveraging technology, such as online reservation systems, digital diaries, WhatsApp for driver communication, and tablets for welcome signs.
- On our Guided Tours, we have replaced plastic water bottles with eco-friendly, plant-based alternatives to reduce plastic waste.
- Recycling facilities are readily available at our depot, ensuring that waste is managed responsibly.

Active Community Engagement

The LSQ team proudly supports local communities through monetary and time donations, including:

- Wakatipu Reforestation Trust
- Assisting with outings and events for Abbeyfield House residents
- Sponsoring local school students in sporting events

At Limousine Services Queenstown, we are unwavering in our commitment to preserving New Zealand's natural environment and nurturing community well-being through sustainable practices. We continuously seek ways to reduce our environmental impact.
